

How to use Lindbergh's eLibrary on your new Nook or Tablet

Getting Started:

You will need your student's 10-digit state ID.

You will need an adobe ID to read the book (instructions below).

You will need to install the reading app on your device (instructions below).

Getting your Adobe ID:

1. Go to www.adobe.com
2. Click "**sign in**" in the upper left-hand corner.
3. Click "**don't have an Adobe ID**" link.
4. Enter all the required fields on My Adobe account page and hit "**create**" when you are finished.
5. Remember your email and password (you will need it).

Installing the reading app on your device:

1. Before you can check out your first eBook, you need to install a free app called **OverDrive Media Console** (OverDrive is the name of the electronic library).
2. Go to your App store and select Overdrive Media Console and tap "**free**" then "**confirm**" to download
3. Once it has installed, open it.
4. Tap "**menu icon**" (it's a circle with three lines), then "**App Settings.**"
5. Now enter the email address for your adobe account and password that you set up earlier.
6. To finish, tap "**authorize**".

Getting to Lindbergh's eLibrary OverDrive collection:

1. Go to the Lindbergh home page from your device: www.lindberghschools.ws.
2. Under the "**Students**" tab, the first item is "**eLibrary**" – click on it (or, you could access the eLibrary directly by going to <http://elibrary.lindberghschools.ws>).
3. It will take you to a login page where you will enter your student's 10 digit ID.

How to check out a book:

1. Once you are logged into the OverDrive system (eLibrary), you will see books on the shelves and in the pull-down tabs at the top. Browse books by genre, age-level, or title.
2. After choosing a book, you should see a GREEN tab that says "**bookbag**" – click it. (If not, then the book is currently unavailable). Once you click the green "**bookbag**" tab, it might ask you to choose the version of book you want. If you are using the Nook, you can only choose the Adobe **ePUB** and **PDF** versions. The Kindle version will not work.
3. Once you select the book format, then a screen will pop-up with a green button asking you to "**checkout**"
4. The book will then be transferred to "**My Locker**" where you can see all the books currently checked out to you.
5. Click the "**Download**" button, and then you will see a blue screen saying it is loading.
6. You will see a page of instructions from OverDrive, just close this by clicking the bottom right hand corner.
7. You should see a title with all the books downloaded to your nook. You can open the book by clicking on its title.
8. After closing it, to get back into the book, you open the OverDrive app and you will see the list again. Books will automatically be returned at the end of their lending period. You don't need to do anything.

If you are a member of the St. Louis County Library, they also use the OverDrive system and have titles you can download using these instructions.
